## The world of media is changing fast.

External factors continue to put pressure on the media landscape. Increases in market demand, a rise in remote work, the need to scale quickly, and value chain disruption require media organizations to move faster to keep pace.

But that's easier said than done when inflexible, on-premise systems make it hard to balance critical business continuity with innovation. Without real-time access to accurate data, you're often left playing catch-up with change rather than staying ahead of it.

That's why media companies with a frictionless foundation for finance, HR, planning, and analytics are better equipped to tackle change with confidence. With an enterprise management cloud from Workday, you can better support current and future business needs, manage uncertainty and risk, and drive smarter decision-making across the organization.

Learn why Workday is a trusted partner to more than 7,900 organizations around the globe—including many of the world's leading technology companies and 45 percent of the *Fortune* 500—and start planning for an even brighter future.
