

# Unlock a New Breed of Endpoint Protection

HP Wolf Security is always on and always watching, so you can get back to business.

Insight 

HP WOLF SECURITY

## Cybercriminals have their sights set on your endpoints.

The modern threatscape is evolving, and cybercriminals are more sophisticated, organized and determined than ever before. But it's not just the threatscape that's evolving — today's workforce has drastically shifted to be more dispersed, mobile and flexible. Companies are facing a growing dilemma: How do we build the hybrid workforce of the future without exposing our business to unprecedented levels of cyber risk?

Unfortunately, hackers aren't confined by office walls. Dispersed employees produce an expanded attack surface, meaning more technology, higher cloud usage and ample opportunity for cybercriminals to infiltrate your IT environment.

Cybercriminals know that remote devices and home Wi-Fi networks are especially vulnerable, and they're taking full advantage. After all, advanced office security systems aren't that effective when employees aren't there to use them.

It's time your security started working from anywhere.

# Let's rethink your endpoint defense.

Endpoints have become a prime target for cyberattacks. An endpoint refers to any device that connects to a computer network. That means laptops, tablets, desktop computers, cell phones and servers. So, many of the tools you depend on during every workday may be at risk.

In our digital world, you need comprehensive endpoint security to safeguard entry points into your network.

## **That's where HP Wolf Security™ comes in.**

Built on over 20 years of research, innovation and strategic acquisitions, HP® Wolf Security contains a vast array of solutions that are built into the hardware itself, guaranteeing end-to-end defense.

With leading solutions, you'll receive robust, vigilant endpoint protection that's built into HP printers and PCs, providing a secure, resilient foundation. From self-healing firmware and in-memory breach detection to threat containment via isolation, HP Wolf Security reduces the addressable attack surface and enables remote recovery from firmware attacks.

With this new breed of endpoint protection, you'll employ security that's always on and always watching.

# Did you say protection built into devices?

We sure did.

HP® Elite PCs, Workstations and select Pro PCs come pre-installed with a stack of hardware-enforced security features that enable teams to work safely from anywhere, without fear of modern threats. HP PCs with HP Wolf Security™ for Business are built with layers of protection below, in and above the operating system.

## Defend against known and unknown threats with leading solutions.

HP Wolf Security provides a vast array of protection solutions to reduce the addressable attack surface and enable remote recovery from firmware attacks.

### Application isolation

With HP Sure Click, files, applications and web pages are opened inside micro virtual machine containers, trapping malware so your endpoints and user data stay secure.

### Firmware security and resilience

HP Sure Start, the world's first self-healing Basic Input Output System (BIOS), automatically recovers from firmware attacks or corruption by restarting with a safe copy of the BIOS.

### Application persistence

HP Sure Run keeps critical security processes up and running, even if malware tries to shut them down.

### Next-generation antivirus

HP Sure Sense — an intelligent threat defense that uses deep-learning AI — finds and neutralizes malware and ransomware.

### Built-in privacy screen

Shield sensitive information from prying eyes with just the touch of a button with HP Sure View.

### Operating system resiliency

HP Sure Recover allows users to automatically restore their OS using only a network connection, no IT required.

### Firmware administration

HP Sure Admin creates a digital signature that allows IT administrators to securely manage BIOS settings over the network

### Hardware root of trust

The HP Endpoint Security Controller allows you to quickly recover your PC from attacks with an isolated chip that acts as a control center for monitoring vulnerabilities.

# Which security level is right for your business?

HP Wolf Security™ for Business provides two levels of hardware-enforced, always-on, resilient defense. Self-managed and fully managed services give you and your team access to cybersecurity experts and powerful analytical tools.

## **HP Wolf Pro Security**

For businesses with overwhelmed IT teams or no dedicated IT resources, HP® Wolf Pro Security solutions offer powerful software and additional services to counter aggressive cyberattacks. You'll partner with experts and leverage advanced tools to deliver enhanced endpoint security for your business.

## **HP Wolf Enterprise Security**

Designed for large-scale enterprises and public sector organizations, HP Wolf Enterprise Security offers robust solutions that free up IT's time while providing better experiences for end users. Now, you can protect your business and stay focused on what really matters.

# Stop cybercriminals in their tracks.

With a secure foundation as your first line of defense, you can focus on doing what you do best.

HP Wolf Security offers:

- **A protection-first approach:** Stop zero-day attacks with a multilayered defense combining advanced, Next-Generation Antivirus (NGAV) protection with isolation technologies.
- **Powerful identity shield:** Prevent password theft by alerting and blocking users from sharing login details on known malicious and low-reputation websites.
- **Enterprise-grade defense:** Thwart undetectable threats with isolation technology that's trusted by government agencies around the globe and adapted for ease of use.

## Secure hybrid work.

Is HP right for you? Talk with an Insight security expert today and experience endpoint protection you can trust.

# About Insight

Insight Enterprises, Inc. is a Fortune 500 solutions integrator helping organizations accelerate their digital journey to modernize their business and maximize the value of technology. Insight's technical expertise spans cloud and edge-based transformation solutions, with global scale and optimization built on 34 years of deep partnerships with the world's leading and emerging technology providers.
