

Solution Brief

Why Lenovo with Insight, Intel and Windows 11

Reimagine devices and redefine work

As modern business evolves so do the needs of modern professionals. Today's teams need to be productive anytime and anywhere with innovative tools, including AI for the next generation of work. From small and medium businesses to enterprises, Lenovo and Intel deliver a range of devices that promote ease of use and productivity that help you accomplish your goals.

The next wave of business computing is here. Lenovo® devices powered by Intel® Core™ Ultra processors and Microsoft® Copilot in Windows 11® can handle AI tasks like summarizing emails and providing meeting transcripts in seconds. These devices are built for what IT needs and users want.

Leveraging Intel for Lenovo devices

With its Intel Core Ultra processors, Intel opened a new world of laptop power and portability for the mid-2020s. Discrete-level built-in graphics for creating and gaming. New power management techniques to extend battery life in high-performance settings. And pulling it all together — an innovative on-chip AI engine that accelerates today's AI workloads.

Intel Core Ultra processors are built differently so they perform differently:

- Dedicated processing support for AI-enabled tasks
- Available Intel Arc graphics for superior visuals
- Specialized low-power processing to limit power drain

Why choose Insight?

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions® that help your organization run smarter. We deliver strong supply chain optimization, workplace solutions, data center transformation expertise and modernized applications. Combined, these solutions keep your business running, foster flexible work environments and put you at the forefront of innovation.

As one of Lenovo's largest partners, Insight can help you accomplish your IT goals, achieve new efficiencies and realize cost savings every step of the way. We combine an array of advanced services and expert technical resources to provide you with the level of support you need.

\$600 million in Lenovo sales annually

National Solutions Provider – Lenovo's highest-level partner

Award-winning team of global Lenovo specialists

Why upgrade to Windows 11 with Insight and Lenovo?

For today's IT teams to work confidently across multiple environments, they must deploy, secure and manage devices from anywhere.

93% of organizations are adopting a digital-first business strategy for more flexible workspaces.¹

Insight and Lenovo help IT professionals simplify IT management without interruption. We're constantly in pursuit of smarter solutions to prepare you for any challenge you face today, tomorrow and beyond. Together, Insight and Lenovo are helping organizations upgrade to Windows 11, so your teams are prepared for the future of work.

Lenovo and Windows 11

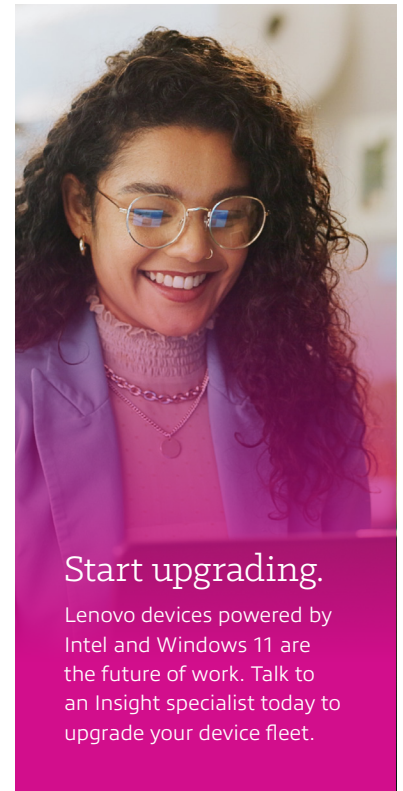

Moving to Windows 11 will feel more like an update than a major upgrade and will deliver an improved user experience for more productive and secure work. All the new Microsoft OS benefits are amplified by the quality, design and innovation of modern Lenovo devices. Here's what you need to know. Windows 11 provides a familiar but modern and refreshed interface that helps increase productivity and enhances the collaboration experience for end users while maintaining consistent management for IT-managed devices — right from the start.

Six steps for migration

- 1 Enlist an expert**
Insight and Lenovo help deploy, configure and support the latest solutions to enable you to unlock all the benefits of Windows 11.
- 2 Learn the system requirements**
Review the basic and feature-specific requirements for installing Windows 11 on a PC.
- 3 Inventory for fleet's compatibility**
Determine which devices in your network meet the minimum system requirements. Businesses will be able to move eligible PCs directly to Windows 11 using Windows Update for Business.
- 4 Confirm with your partners and check accessories**
Check with your software publisher or accessory manufacturer for specific details on your products.
- 5 Validate business-critical applications**
App compatibility is a core design tenet of Windows 11. For peace of mind, use Test Base for Microsoft 365™ to test your applications in preview. If any compatibility issues arise, Microsoft App Assure will remediate them.
- 6 Develop a rollout schedule**
Keep the Windows 10 support deadline top of mind so you don't risk running an unsupported OS. Start getting ready for Windows 11 as soon as you can and plan to complete your migration well before October 14, 2025.
